## CAREER OBJECTIVE

B.Tech CSE undergraduate with skills in problem-solving and experience in C++, and full-stack development.

Examination	Institute	Year
B. Tech CSE	UPES, Dehradun.	2022- 2026
Senior School, CBSE	DPS Rajnagar Extension, Ghaziabad.	2021-2022
Secondary School, CBSE	DPS Rajnagar Extension, Ghaziabad.	2019-2020

## SKILLS

- Languages:** C/C++, Python.
- Full Stack Development:** JavaScript , AngularJs ,Node JS, HTML, CSS.
- Python:** ML, DL , ComputerVision , Agentic-Ai , Gen-Ai.
- Database:** SQL.
- Additional Skills:** Very Basic DevOps practices
- Operating System:** Windows, Linux.
- Soft Skills:** Creativity, Time management, Problem Solving, Team management.

## INTERNSHIPS

### AI/ML Intern - Adeptia

**May 2025 - July 2025**

- Built ML & DL , NLP models using Scikit-learn and TensorFlow and HuggingFace.
- Worked on ComputerVision and GenAI features using LLMs, and Transformers , Along with Agentic Ai and Generative-Ai.
- Worked on Agentic-Ai and RAG based ChatBot with Memory.

### Social Intern - Saaras Foundation

**May 2023 - July 2023**

- Helped in community outreach programs, helped organize awareness drives on healthcare. Collaborated with local groups to support underprivileged people. Helped underprivileged people access government schemes.

## PROJECTS

### Medical Image Captioning | Deep Learning, KAN, ReactJs

**Jan 2025 - May 2025**

- Built a deep learning pipeline for brain tumor detection and medical caption generation using KAN with ViT.
- ReactJS front-end for patient authentication & MRI upload.
- Connected front-end to PyTorch backend via Flask API for real-time inference.
- Pipeline: upload → preprocess → ViT → classify → caption → display.
- Link: <https://github.com/ishaanntyagi/Medical-Image-Captioning>

### Agentic AI-Powered SDLC Automation | LangChain , LangGraph

**July 2025**

- Created a SDLC automation tool using agentic Generative AI ,Python, and LangGraph, with each SDLC phase as a node
- Each node is like a checkpoint ,it guides users through stages such as collecting requirements, designing the system, writing code, and explaining how the code works ,using LangChain to connect everything.
- Used Ollama's local API with Python to send simple requests and get AI-generated code and explanations for my project.
- Link: <https://github.com/ishaanntyagi/LangGraph-SDLC-Automation.git>

### Discord Clone | Web Development, HTML, CSS, JS, NodeJs

**March 2024 - May 2024**

- Developed a web-based application that replicates key features of Discord Website, including user authentication, using HTML, CSS, and JavaScript.
- Enhancing User Experience by integrating form validation through AngularJS, and also applied error handling.
- Implemented Backend Operations with Node.js and MySQL for data storage, optimizing data management.
- Link: <https://github.com/ishaanntyagi/DiscordClone>

## CERTIFICATES

- Mastering Generative AI and ChatGpt by GeeksForGeeks
- GenAi Foundations by UpGrad and Microsoft
- DevOps 40 Hour BootCamp by INT Israel

**July 2025**

**July 2025**

**Sept 2024**
